

## Disabling the Oxygen Sensor Circuit for off-road use on the 02-03 Suzuki GSX1300R

### Looking at the ECU

Remove the Black wire (with Brown stripe) from the connector that mates with this location (pin 11)

Unplug the large connector from the ECU.

Push in the single White tab on the side of the connector.

While holding the connector, pull out the Black wire (Brown stripe) that mates with pin 11 on the ECU.

Push in the two White tabs on the other side of the of the connector to secure the other wires.

Plug the connector back into the ECU.
